Your Learning Goal:

Embarking on a light mini unit. Students will develop a kinesthetic understanding of frequency to apply to the larger concept of light and sound waves

Table of Contents: Heart Beat Frequency – 18L + R

Catalyst (18L):

What are some different kinds of waves and how might they be unique?

Homework:

Periodic Webquest
Atomic Basics

Agenda:

1. Catalyst
2. Frequency Lab
3. Reflection

Table of Contents

<u>Date</u>	<u>Assignment</u>	<u>Pg #</u>
10/8/18	Our Expanding Universe	9 L + R
10/8/18	The Universe: Beyond the Big Bang	10 L + R
10/11/18	Going Subatomic	11 L + R
10/15/18	Changing Phases	12 L + R
10/16/18	Conservation of Mass	13 L + R
10/19/18	It's Elementary	14 L + R
10/23/18	We're Changing	15 L + R
10/25/18	Atomic Jeopardy	16 L + R
11/6/18	Star Bright	17 L + R
11/9/18	Heartbeat Frequency	18 L + R

11/9/18

Catalyst:

What are some different kinds of waves and how might they be unique?

Heartbeat Frequency

Test situation	Beats per 15 s	Pulse rate (R) * beats/min	Pulse frequency (f) ** beats/s
Sitting			
Lying down			
After standing up and sitting down 10 times			
After 30 s of running in place or jumping jacks			

Calculations:

18L

18R

18R

Test situation	Beats per 15 s	Pulse rate (R) ★ beats/min	Pulse frequency (f) ★★ beats/s
Sitting			
Lying down			
After standing up and sitting down 10 times			
After 30 s of running in place or jumping jacks			

Choose Your Guinea Pig!

Measure pulse rate in these four conditions.

- Sitting quietly.
- Lying down on a clean place on the floor.
- Alternating between standing and sitting in a chair ten times.
- Running in place or doing jumping jacks for 30 seconds.

Calculations

- 1.** If the pulse rate you measured is a certain number of beats in 15 seconds, how could you find the number of beats in 1 minute?
- 2.** How could we convert our pulse rate in beats per minute to a frequency in beats per second?

Calculations

1.

★ Pulse *rate* (beats/minute)

$$R = \text{number of beats per 15 seconds} \times \underline{\quad 4 \quad}$$

2.

★★ Pulse *frequency* (beats/second)

$$f \text{ (beats/s)} = \frac{R \text{ (beats/min)}}{\underline{\quad 15 \quad} \text{ (s/min)}}$$

Intro

11/8/18

Catalyst:

What are some different kinds of waves and how might they be unique?

Reflection:

Create a definition for frequency, use your lab data AND the picture below as evidence.

Heartbeat Frequency

Test situation	Beats per 15 s	Pulse rate (R) * beats/min	Pulse frequency (f) ** beats/s
Sitting			
Lying down			
After standing up and sitting down 10 times			
After 30 s of running in place or jumping jacks
