	Shark	Tuna	Frog	Human	Rabbit	Alligator	Bird	Dolphin
<b>Vertebrate</b>								
<b>Bony Skeleton</b>								
<b>Four Limbs</b>								
<b>Amniotic Egg</b>								
<b>Hair</b>								
<b>Fossil Skull with 2 Extra Openings</b>								

**Vertebrate:** An organism that has vertebrae formed into a backbone

**Amniotic Egg:** The embryo of the organism develops inside a sac of protective fluid called the amnion.

**Skull description:** In the fossil skulls of these organisms, two skull openings have been found in addition to the openings for eyes and nostrils. These openings are on the side of the skull behind each eye.
