

# Forces Jeopardy

Adapted by T. Trimpe <http://sciencespot.net/>

**Contestants**

**Don't**

**Forget...**

# **RULES**

1. You should NOT write your answers in the form of a question.
2. You DO need to keep track of your score. You do NOT lose points if you answer incorrectly.

## **RULES**

3. Your team should answer EACH question on your whiteboard.
4. We will rotate who has control of the board, choosing the question.

Motion	Name that Force	Units	Newton's Laws	Calculate this force
<u>100</u>	<u>100</u>	<u>100</u>	<u>100</u>	<u>100</u>
<u>200</u>	<u>200</u>	<u>200</u>	<u>200</u>	<u>200</u>
<u>300</u>	<u>300</u>	<u>300</u>	<u>300</u>	<u>300</u>
<u>400</u>	<u>400</u>	<u>400</u>	<u>400</u>	<u>400</u>
<u>500</u>	<u>500</u>	<u>500</u>	<u>500</u>	<u>500</u>

## Motion for \$100

**Velocity or Acceleration change  
when....**

**(name all possibilities)**

- **Speed changes**
- **Direction changes**
- **Both speed AND direction change**

**Back to  
Game**

## Motion for \$200

**What is the acceleration of  
gravity?**

**9.8 m/s<sup>2</sup>**

**Back to  
Game**

## Motion for \$300

**Draw a distance versus time graph for a stationary object**

**(Label X & Y axis)**

**Back to  
Game**

## Motion for \$400

**If equal and opposite forces  
cause no acceleration they  
are said to be...**

# Balanced

**Back to  
Game**

**Daily Double!!**

**(Worth 1000 points!)**

**How are mass and weight  
different?**

• **Mass** is how much matter an object is made of. It cannot change

• **Weight** is a force representing the pull of gravity on an objects mass. Weight is variable.

Back to  
Game

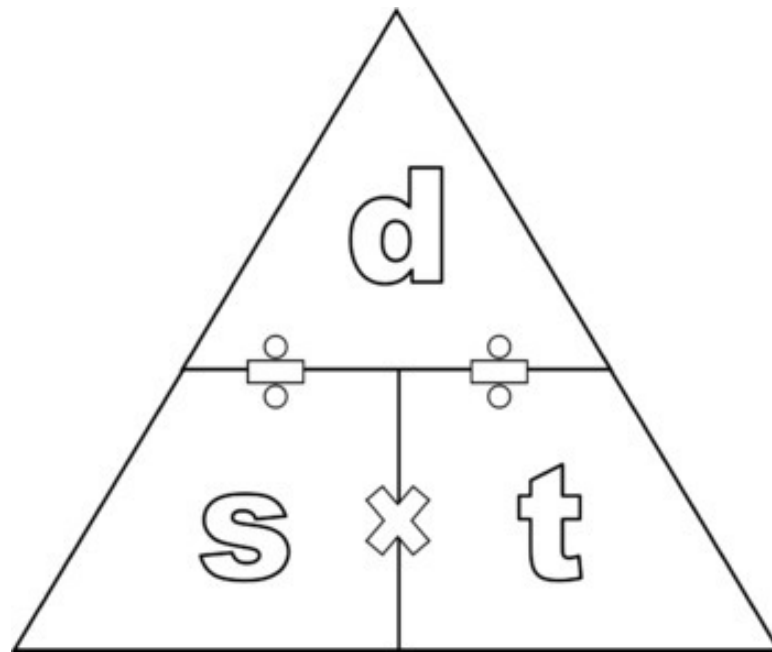

Name that force for \$100

**I'm looking to solve for how fast something is traveling, how long it took or how far it went.**

**What formula do I use?**

**S = d / t**

**Back to  
Game**

Name that force for \$200

**I push and push but this force stops the object from going anywhere, how frustrating!**

# Friction

**Back to  
Game**

## Name that force for \$300

**Newton, a famous physicist discovered this force while sitting in an orchard.  
An apple just fell on his head.**

# Gravity

**Back to  
Game**

## Name that Force for \$400

**Playing tug of war with my friends  
you can see this force in action.**

# Tension

**Back to  
Game**

Name that force for \$500

**Our planets orbit around the Sun  
because of this (these) force(s)**

# Centripetal Force

&

# Gravity

**Back to  
Game**

## Units for \$100

**What does “m/s” mean?**

**AND**

**What is it a unit of?**

# Meters per second

It is the unit for:

**SPEED**

**Back to  
Game**

## Units for \$200

**What does “m” mean?**

**AND**

**What is it a measure of?**

# Meters

It is a unit of:

**Distance**

**Back to  
Game**

## Units for \$300

**What does “kg” mean?**

**AND**

**What is it a unit of?**

# Kilograms

It is a unit of:

**Mass**

**Back to  
Game**

## Units for \$400

**What does “m/s<sup>2</sup>” mean?**

**AND**

**What is it a unit of?**

**Meters per second  
squared**

**It is a unit of:**

**Acceleration  
(velocity)**

**Back to  
Game**

## Units for \$500

**What does “N” mean?**

**AND**

**What is it a unit of?**

# Newton

It is a unit of:

**Force (weight too)**

**Back to  
Game**

## Newton's Laws for \$100

**The harder you pedal a bicycle the faster it will go is which of Newton's laws?**

# *Newton's 2nd Law*

*Force = mass / acceleration*

**Back to  
Game**

## Newton's Laws for \$200

**The main reason a person can jump off the ground is which of Newton's laws?**

# **Newton's 3<sup>rd</sup> Law**

**Every action has an equal  
and opposite reaction**

**Back to  
Game**

## Newton's Laws for \$300

**A hockey puck will slide on the ice for a long time when hit until...**

**(finish the sentence & tell me the law)**

# **Newton's 1<sup>st</sup> Law**

**An object stays in motion unless acted upon by an outside force**

**Back to  
Game**

## Newton's Laws for \$400

# Newton's 2<sup>nd</sup> Law of Motion

$$\mathbf{F} = \mathbf{m} \times \mathbf{a}$$

**Back to  
Game**

## Newton's Laws for \$500

**What is the weight of a person who has a mass of 40 kg?**

**Show your work  
(you can use a calculator)**

$$\mathbf{F = m \times a \quad OR \quad weight = m \times a}$$

$$\mathbf{Weight = 40kg \times 9.8 \text{ m/s}^2}$$

$$\mathbf{Weight = 392 \text{ N}}$$

**Back to  
Game**

Calculate this Force for \$100

**Draw a free body diagram for a person pushing a large oven to the left with a push of 10N and a friction force of 7N.**

**SOLVE FOR THE NET FORCE**

**Label all of the forces acting on the “box” using arrows of the correct length.**

**Back to  
Game**

## Calculate this Force for \$200

**An object is falling toward the Earth at  
9.3 m/s<sup>2</sup>.**

**Why is the object NOT falling at 9.8 m/s<sup>2</sup>?**

**(Hint: What forces resist an object's  
motion in the opposite direction?)**

# **Air Resistance**

# **Friction**

**Back to  
Game**

## Calculate this Force for \$300

**What is the acceleration of a  
50 kg object pushed with a force  
of 500 Newtons?**

$$F = m \times a$$

$$F = 500\text{N}$$

$$m = 50 \text{ kg}$$

$$\text{Acceleration} = 10 \text{ m/s}^2$$

(your units must be correct!)

**Back to  
Game**

## Calculate this Force for \$400

**A paratrooper jumps from an airplane and waits 3 seconds before releasing his parachute.**

**How far did he fall in those 3 seconds?**

$$\text{Distance} = .5gt^2$$

$$g = 9.8$$

$$t = 3$$

$$.5 (9.8) (3^2)$$

$$D = 44.1\text{m}$$

**Back to  
Game**

Calculate this Force for \$500

**A 60 kg Gila monster on a merry-go-round is traveling in a circle with a radius of 3 m at a speed of 2m/s  
What is it's centripetal force?**

$$F_c = m(v^2) / r$$

$$F_c = 60(2^2) / 3$$

$$F_c = 80\text{N}$$

**Back to  
Game**

# ***Final Jeopardy***

***How many points do  
you want to risk?***

# *Final Jeopardy*

**A cyclist turns a corner with a radius of 50m, a speed of 10m/s and a force of 240N.**

**What is the mass of the cyclist and his bike?**

$$F_c = m(v^2) / r$$

$$240\text{N} = m (10^2) / 50$$

$$\text{Mass} = 120\text{kg}$$

**And the winner is ...**
