REFERENCES CITED FORMAT

General Directions

Entries in a REFERENCE CITED section are alphabetized by the <u>last name of the author</u>: the date (of critical interest in science) is placed directly afterwards. An entry for which the author is unknown, such as a newspaper article or an unsigned review is alphabetized by the first word of the title, excluding the articles "a", "an," and "the." Always double-space and indent the second and succeeding lines of each reference. Do not number your references and if you have two or more references *BY THE SAME AUTHOR*, alphabetize them starting with the most recently written paper. Consult your English department for preferred format for science papers.

It is important to consult a VARIETY of sources when doing your research (more than <u>just</u> internet sources...)
