Your Objective:

Students will use persuasive arguments to write a letter explaining why scientists should use the same units of measurement.

Pre-Write (separate sheet of paper):

Read the article on your desk. Brainstorm ideas on why it is important to use the same units.

Homework:
Quiz Corections

Agenda:

1. Do-Now
2. Why use measurements?
3. Reflection

The Problem:

- A brand new company, Science All the Time (SAT), wants to use their own units of measurements called seets.
- SAT works with scientists all over the United States building better chairs for science class.

Why is it a problem
that SAT wants to use
their own units of
measurement?

Your Task

- Write a letter to *Science All the Time (SAT)*, explaining why they should use the standard units of measurement.

September 19, 2016

Dear Science All the Time,

Paragraph 1: Introduce yourself. What grade are you in, and what school do you go to. What have we been doing in class the last week.

Paragraph 2: Reason #1 why SAT should use standard units. Site evidence from your labs or readings. Reason #2 why SAT should use standard units. Site evidence from your labs or readings. *(This is your paragraph guide.)*

Paragraph 3: Summarize claim. Summarize reason 1. Summarize reason 2. Final sentence.

Sincerely,
Your Name
